

Shed a Light into the Dark with Libra Speed LIS

Backlit advertisements are ideal communication media which draw attention via light and colour. We encounter them every day at every turn, and unquestionably they will continue to play an essential role. The chosen inks and substrates must meet highest requirements as they are continuously exposed to weather conditions.

Libra Speed LIS

Libra Speed LIS is a most reliable ink system for this application. It convinces with a brilliant colour range, very good vacuum formability, and suitability for long-term outdoor use.

Applications

Libra Speed LIS is perfectly suited for the manufacturing of illuminated advertising elements, billboards, displays, or decals made of various materials like:

- Acrylic glass (PMMA)
- PVC self-adhesive films, rigid PVC
- Polystyrene (PS) and polycarbonate (PC)
- ABS / SAN

Comparison	Libra Speed LIS	Mara® Star SR
Printability	+++	++
Mesh opening	+++	++
Vacuum formability	+++	+++
Weather resistance on PMMA:		
Front	+++	+++
Back	+++	+

For further information please refer to the Technical Data Sheet on www.marabu-inks.com

Your Benefits:

Excellent ink system for the production of backlit objects

- Very well suited for printing onto front and back side of PMMA

Highly fade-resistant and glossy colour shades, weather-resistant binder, 4-colour process shades with high-density pigmentation

- For high-quality outdoor advertisements and challenging applications

Extremely flexible binder system

- Elastic ink film allows strong deformation in the deep drawing process

Quick drying

- For high printing speeds

Outstanding mesh opening and high block resistance

- Utmost process and quality safety
